Century's Joist Coatings were formulated to coat marginally prepared open web and long span steel joists, joist girders, and cold-formed steel framing. They were developed to provide protection of the steel substrate during the manufacture, transport, and erection phase. Century's primers were specifically formulated to replace higher VOC solvent-based products. These coatings exhibit the following properties:

- Patented Technology (220 Series Products)
- HAPS Free
- Low to near Zero VOC
- Excellent Application Properties - Low Foam
- Excellent Dip Tank Stability
- Excellent Recoat Properties
- Excellent Early Water Resistance
- Excellent Corrosion Resistance

120 Series

Solvent-based Spray Primers
Solvent-based Dip Primers

220 Series

Water-based Dip Primers
Water-based Spray Primers
Water-based Vacuum Primers
