Century's Transportation Coatings were formulated to coat a variety of different substrates commonly used in the industry. Century has a wide range of products and chemistries available to meet any performance need. With the increasing demand for low VOC and HAPs Free products, Century's Transportation Coatings allow customers the flexibility of meeting the most stringent environmental regulations while maintaining the highest level of performance. These coatings exhibit the following properties:

- Advanced Low VOC Technology (210 Series)
- HAPs Free
- Near Zero VOC in some formulations
- Excellent Application Properties - Spray, Brush, and Roll Formulas
- Excellent Recoat Properties
- Excellent Early Water Resistance
- Excellent Corrosion Resistance
- Excellent Flash Rust Resistance (Water-based)
- Excellent Exterior Durability
